PROFESSIONAL SUMMARY

BCA student specializing in Data Science and Machine Learning, with project experience in predictive modeling, AI-powered applications, semantic search, and time-series forecasting. Skilled in Python, data preprocessing, feature engineering, machine learning model evaluation, and API development. Interested in building practical AI/ML solutions using modern machine learning and Generative AI technologies.

TECHNICAL SKILLS

- **Programming :** Python, SQL, C++, C, JavaScript, Java (Basic), PHP
- **Data Science & Analytics :** Pandas, NumPy, Data Cleaning, Data Analysis, Data Visualization, SQL
- **Machine Learning :** Scikit-learn, XGBoost, Feature Engineering, Model Training, Model Evaluation
- **Generative AI** : Embeddings, RAG, Large Language Models, Prompt Engineering, Gemini AI, Semantic Search
- **Backend & APIs :** FastAPI, REST APIs
- **Databases :** MySQL, PostgreSQL, Qdrant, NeonDB
- **Tools & Deployment :** Git, GitHub, Jupyter Notebook, Docker, Streamlit

PROJECT EXPERIENCE

SkillCart AI — AI-Powered Job Matching Platform
GitHub | Live Demo

Python, FastAPI, Gemini Embeddings, Qdrant, PostgreSQL, Docker

- Developed an AI-powered workflow for resume parsing and semantic job matching using embedding-based retrieval.
- Integrated Gemini embeddings and Qdrant vector search to identify relevant job opportunities based on candidate profiles and job requirements.
- Developed REST API endpoints using FastAPI and integrated PostgreSQL/Neon for application data management.
- Worked with vector search and backend integration to connect candidate information with job-matching functionality.

SIH — Explainable AI for Diabetic Retinopathy Screening
GitHub

Python, Computer Vision, Image Processing, OpenCV

- Worked on a computer vision pipeline for retinal fundus image preprocessing and diabetic retinopathy screening.
- Contributed to a five-class severity classification workflow for retinal image analysis.
- Applied image preprocessing and augmentation techniques to prepare images for model training.
- Explored explainability heatmaps to visualize image regions influencing model predictions.

Sales Forecasting & Demand Intelligence System
GitHub | Live Demo

Python, Pandas, NumPy, Scikit-learn, XGBoost, SARIMA, Prophet, Streamlit

- Developed a time-series forecasting pipeline to estimate future sales demand using historical sales data.
- Implemented and compared SARIMA, Prophet, and XGBoost forecasting approaches.
- Evaluated forecasting performance using MAE, RMSE, and MAPE to compare prediction errors
- Developed an interactive Streamlit dashboard to visualize forecasts and communicate demand trends.

EDUCATION

Bachelor of Computer Applications (BCA) — Apr 2024 – Apr 2027
Sahyog College of IT and Management
CGPA: 8.65 / 10

Higher Secondary Certificate (HSC) – Science — February 2024
Navjeevan High School and Junior College
Percentage: 66.67%

CERTIFICATIONS

The Ultimate Job Ready Data Science Course — CodeWithHarry | December 2025 — Certificate | December 2025
- Topics: Python, NumPy, Pandas, SQL, Data Visualization, Machine Learning Fundamentals

Introduction toGenerativeAI Studio – Google Cloud — Certificate | June 2026
- Topics: Generative AI, Google AI Studio, Prompt Engineering, Responsible AI, Google Cloud AI Tools
